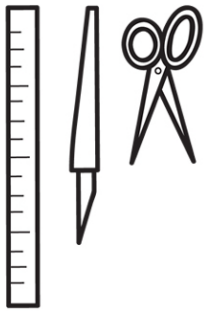
INSTRUCTIONS

Please read through before starting your Noggin...

EQUIPMENT:

You will need... glue, scissors, a ruler (preferably metal) and a craft knife.



1: Lightly score all the dotted 'fold' lines with the blade of your scissors, or the back of the craft knife, using the ruler as a guide & being careful not to cut through the card. Keep an eye on your fingers!

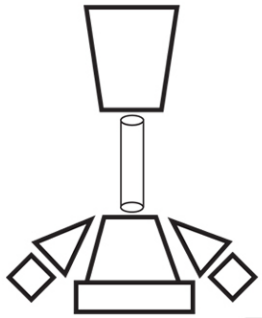
Score & fold lines: — — — — —

2: With the craft knife cut all the solid black cut lines on the hands, neck of the head & body, & (if any) other areas such as the ears, face etc.

Cut marks:

Cut spoke lines only, leaving triangle tabs attached.

Cut out the entire square or rectangle.



3: Now cut out & assemble the individual parts (arms, hands, head, torso etc) & let dry before assembling the complete Noggin. It's really useful to have a slim paint brush or 'pokey stick' handy for firming down the tabs inside as you build.

4: THE NECK - Cut the square of paper (70 mm x 70 mm).
Roll round a pencil gluing the free flap and sealing as a tube. Slide the neck tube off the pencil and use to join the two neck areas of your Noggin.

THE NECK
